DAY 6 — HTML FUNDAMENTALS

Completed Task: Personal Profile, Registration Form & Student Records

This solution covers the uploaded task sheet: a personal profile page, student registration form, student records table, and semantic HTML elements.

1. HTML Code — save as index.html

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>My Profile and Student Registration</title>
    <link rel="stylesheet" href="style.css">
</head>
<body>
    <header>
        <h1>My Personal Profile</h1>
        <p>Welcome to my personal webpage.</p>
        <nav>
            <a href="#about">About Me</a> |
            <a href="#skills">Skills</a> |
            <a href="#registration">Registration</a> |
            <a href="#records">Student Records</a>
        </nav>
    </header>

    <main>
        <section id="about">
            <h2>About Me</h2>
            <p>Hello! My name is Your Name. I am a student interested in programming and web development.</p>
            <img src="profile.jpg" alt="My profile photo" width="150">
        </section>

        <section id="skills">
            <h2>Skills and Interests</h2>
            <h3>Skills</h3>
            <ul>
                <li>HTML</li>
                <li>CSS</li>
                <li>Java</li>
            </ul>
            <h3>Learning Goals</h3>
            <ol>
                <li>Learn web development</li>
                <li>Build practical projects</li>
                <li>Create a portfolio</li>
            </ol>
        </section>

        <section id="registration">
            <h2>Student Registration Form</h2>
            <form action="#" method="post">
                <label for="student-name">Full Name:</label>
                <input type="text" id="student-name" name="studentName" required>
                <br><br>

                <label for="email">Email:</label>
                <input type="email" id="email" name="email" required>
                <br><br>

                <label for="student-id">Student ID:</label>
                <input type="text" id="student-id" name="studentId" required>
                <br><br>

                <label for="course">Course:</label>
                <select id="course" name="course" required>
                    <option value="">Select a course</option>
                    <option value="MCA">MCA</option>
                    <option value="BCA">BCA</option>
                    <option value="BSc">B.Sc.</option>
                    <option value="Other">Other</option>
                </select>
                <br><br>

                <fieldset>
                    <legend>Gender</legend>
                    <label><input type="radio" name="gender" value="male"> Male</label>
                    <label><input type="radio" name="gender" value="female"> Female</label>
                    <label><input type="radio" name="gender" value="other"> Other</label>
                </fieldset>
                <br>

                <label for="dob">Date of Birth:</label>
                <input type="date" id="dob" name="dob">
                <br><br>

                <label for="address">Address:</label>
                <textarea id="address" name="address" rows="3"></textarea>
                <br><br>

                <button type="submit">Register</button>
                <button type="reset">Clear Form</button>
            </form>
```

```
        </section>

        <section id="records">
            <h2>Student Records</h2>
            <table>
                <caption>Sample Student Records</caption>
                <thead>
                    <tr>
                        <th scope="col">Student ID</th>
                        <th scope="col">Name</th>
                        <th scope="col">Course</th>
                        <th scope="col">Email</th>
                    </tr>
                </thead>
                <tbody>
                    <tr>
                        <td>101</td><td>Aarav Sharma</td><td>MCA</td><td>aarav@example.com</td>
                    </tr>
                    <tr>
                        <td>102</td><td>Meera Patel</td><td>BCA</td><td>meera@example.com</td>
                    </tr>
                    <tr>
                        <td>103</td><td>Rahul Verma</td><td>B.Sc.</td><td>rahul@example.com</td>
                    </tr>
                </tbody>
            </table>
        </section>
    </main>

    <footer>
        <p>&copy; 2026 My Personal Profile. HTML Fundamentals Practice.</p>
    </footer>
</body>
</html>
```

2. CSS Code — save as style.css

```
/* Basic styling for the Day 6 HTML assignment */
* {
    box-sizing: border-box;
}

body {
    font-family: Arial, sans-serif;
    line-height: 1.6;
    margin: 0;
    padding: 20px;
    background-color: #f3f6fb;
    color: #222;
}

header, main, footer {
    max-width: 900px;
    margin: 0 auto;
}

header {
    background-color: #2563eb;
    color: white;
    padding: 24px;
    border-radius: 10px;
}

nav a {
    color: white;
    margin-right: 10px;
}

section {
    background-color: white;
    margin: 18px 0;
    padding: 20px;
    border-radius: 10px;
    box-shadow: 0 2px 8px rgba(0, 0, 0, 0.06);
}

img {
    border-radius: 50%;
    object-fit: cover;
}

form input, form select, form textarea {
    padding: 8px;
    margin-top: 5px;
    max-width: 100%;
}

button {
    padding: 10px 14px;
    border: none;
    border-radius: 6px;
    cursor: pointer;
}

table {
    width: 100%;
    border-collapse: collapse;
}

caption {
    font-weight: bold;
    margin-bottom: 10px;
}

th, td {
    border: 1px solid #d5dbe5;
    padding: 10px;
    text-align: left;
}

th {
    background-color: #e8eefc;
}

footer {
    text-align: center;
    color: #555;
    padding: 12px;
}
```

3. How to Run the Project

1. Create a folder named Day6_HTML.
2. Create two files inside it: index.html and style.css.
3. Copy the HTML code into index.html and the CSS code into style.css.
4. Keep the line <link rel="stylesheet" href="style.css"> inside the HTML head; it is already included in the provided code.
5. Put your own image in the same folder and name it profile.jpg, or change the img src to your image filename.
6. Open index.html in a web browser.

4. Concepts Covered

HTML structure: DOCTYPE, html, head, meta, title and body.
Headings and paragraphs: h1, h2, h3 and p.
Links and images: a and img; alt describes the image if it cannot be shown.
Lists: ul/ol create lists and li defines each item.
Tables: table, caption, thead, tbody, tr, th and td organize student records.
Forms: label, input, select, option, fieldset, legend, textarea and buttons.
Semantic HTML: header, nav, main, section and footer describe the roles of page regions.
CSS: styles colors, spacing, layout, table borders and form controls.

5. Important Note

The registration form is a front-end demonstration. Its submit button does not permanently save submissions by itself. Storing form submissions requires a backend or a connected form service. Replace the placeholder profile text and sample student records as needed.
