Day 7 — CSS Fundamentals

Completed Task Solution • HTML + External CSS • Responsive Design

Tasks completed

• Style the personal profile page with a consistent color palette, typography, spacing, and profile card.

• Improve the student registration form with clear labels, focus states, responsive fields, and a submit button.

• Create a sticky navigation bar with working section links.

• Use Flexbox to arrange the hero area and skill cards.

• Use responsive media queries so the layout adapts to desktop, tablet, and mobile screens.

Files you need

Create a folder named **Day7-CSS**. Save the first code section as **index.html** and the second as **style.css**. Keep both files in the same folder.

Optional: put your picture in the same folder and name it **profile.jpg**. Otherwise, change the image filename in the HTML or remove the image element.

1. HTML file — index.html

This page links to the external stylesheet using `<link rel="stylesheet" href="style.css">`. It contains the profile, navigation, Flexbox cards, and registration form.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>My Profile | Student Portal</title>
  <link rel="stylesheet" href="style.css">
</head>
<body>
  <header class="site-header">
    <div class="container header-inner">
      <a class="brand" href="#home">MyProfile</a>
      <nav class="navigation" aria-label="Main navigation">
        <a href="#home">Home</a>
        <a href="#about">About</a>
        <a href="#skills">Skills</a>
        <a href="#registration">Register</a>
      </nav>
    </div>
  </header>

  <main>
    <section class="hero section" id="home">
      <div class="container hero-layout">
        <div class="hero-copy">
          <p class="eyebrow">PERSONAL PROFILE</p>
          <h1>Hello, I'm <span class="accent">Your Name</span></h1>
          <p class="intro">
            I am a student learning web development. I enjoy building useful,
            simple, and responsive websites.
          </p>
          <a class="button" href="#registration">Student Registration</a>
        </div>
        <div class="profile-card">
          <img src="profile.jpg" alt="Profile portrait" class="profile-image">
          <h2>Your Name</h2>
          <p class="muted">Student | Web Development Learner</p>

              <textarea id="address" name="address" rows="3"
                        placeholder="Enter your address"></textarea>
            </div>
          </div>
          <button class="button submit-button" type="submit">Submit Registration</button>
          <p class="form-note">Demo only: this form does not save submissions without a backend or form service.</p>
        </form>
      </div>
    </section>
  </main>

  <footer class="site-footer">
    <div class="container footer-inner">
      <p>© 2026 Your Name. Created for Day 7 — CSS Fundamentals.</p>
      <a href="#home">Back to top ↑</a>
    </div>
  </footer>
</body>
</html>
```

2. CSS file — style.css

Copy all of the following CSS into **style.css**. The code is organized into theme/reset, navigation, profile section, cards, form, footer, and responsive media queries.

```
/* 1. Basic reset and theme variables */
:root {
  --primary: #2563eb;
  --primary-dark: #1d4ed8;
  --text: #172033;
  --muted: #64748b;
  --background: #ffffff;
  --soft-background: #f1f5f9;
  --border: #dbe3ef;
  --card-shadow: 0 10px 28px rgba(15, 23, 42, 0.08);
}

* {
  box-sizing: border-box;
}

html {
  scroll-behavior: smooth;
  scroll-padding-top: 85px;
}

body {
  margin: 0;
  font-family: Arial, Helvetica, sans-serif;
  color: var(--text);
  background: var(--background);
  line-height: 1.6;
}

img {
  max-width: 100%;
  display: block;
}

.container {
  width: min(1100px, 92%);
  margin-inline: auto;
}

.section {
  padding: 72px 0;
}

.section-soft {
  background: var(--soft-background);
}

.section-title {
  margin: 0 0 12px;
  font-size: clamp(1.7rem, 3vw, 2.3rem);
  text-align: center;
}

.section-intro {
  max-width: 720px;
  margin: 0 auto 28px;
  text-align: center;
  color: var(--muted);
}

/* 2. Navigation bar */
.site-header {
  position: sticky;
  top: 0;
  z-index: 10;

  }

  .registration-form {
    padding: 16px;
  }

  .info-card {
    flex-basis: 100%;
  }
}
```

3. How to run the task

Create a folder: Create a folder named Day7-CSS anywhere on your computer.

Create HTML file: Open Notepad or VS Code, paste the HTML code, and save it as index.html. In Notepad, select “All Files” as the file type so it does not become index.html.txt.

Create CSS file: Create another file, paste the CSS code, and save it as style.css in the same folder.

Add photo (optional): Copy a photo into this folder and name it profile.jpg, or change the src value in the HTML.

Open the page: Double-click index.html to open it in your browser. Edit and save either file, then refresh the browser to see changes.

4. CSS concepts used

External CSS: The HTML loads style.css, keeping content and design separate.

Selectors and properties: Examples: body, .container, .navigation a, input:focus. A selector chooses which HTML elements receive styles.

Colors and backgrounds: CSS variables such as --primary: #2563eb store reusable colors. The hex value is a shade of blue; the named color blue is also valid but looks different.

Margin and padding: Margin creates space outside an element; padding creates space inside its border.

Box model: box-sizing: border-box makes an element's declared width include its padding and border.

Flexbox: display: flex arranges items in a row by default. flex-wrap: wrap allows cards to move onto a new row when space is limited.

Responsive design: @media rules change layout at smaller widths. The form changes from two columns to one column on mobile.

Accessible form: Labels are connected to inputs with for/id. Required fields use required, and email uses type=email.

5. Submission checklist

■ index.html and style.css are saved in the same folder.

■ Navigation links scroll to the correct sections.

■ The profile and skill cards look aligned on a desktop screen.

■ The registration form is readable and usable on a narrow mobile screen.

■ The page has been tested by resizing the browser window.

■ Your own name, profile details, and photo (optional) replace the sample details.

Important: This is a front-end demonstration. The form will not store submitted student details by itself. Saving submissions requires a backend, database, or form service.
